ABOUT ME

I am passionate about taking on new challenges, integrating emerging technologies, and crafting optimal solutions to diverse problems. I am self-critical and always open to constructive feedback as a means to continually progress professionally. While my primary expertise lies in Backend development, I've diversified my skill set by learning different technologies to deliver end-to-end systems.

EXPERIENCE

04/2021 – Now

Freelance developer

Development of multiple plugins for Wordpress integrating different payment methods, services and systems via API REST.

Development of 4 Full Stack Web projects in Laravel, including all its phases, integrated via API Rest to corresponding plugins in Wordpress:

- System to store and distribute codes safely and maintaining data integrity.
- System to obtain orders from clients in real time and allow them to be managed by staff.
- System to integrate multiple payment methods and provide payment service at different points of sale.
- System to manage gift card products and the integration between each product and a gift card provider.
